Dear Sir/Madame,

Your job posting on the Internet aroused great interest in me. Since this position appeals to me very much, I am applying to you.

During my school education I discovered my interest in computer science. I could deepen this interest by completing my computer science studies at the Teschniche University Darmstadt.

Over thirteen years of experience in many aspects of web development give me the security of being able to support your company in a versatile and efficient manner.

I am able to manage the organization and execution of projects, from the first contact with the customer, the conception and development of the project to the acceptance of the finished product. I work with common technologies (PHP, MySQL, HTML, CSS, Smarty, JQuery, Dojo, SVN, Git, Linux, CMS ...) and do my tasks carefully, quickly and reliably.

Teamwork and a fast, correct way of working are a matter of course for me. I am a kind and loyal person. My personal strengths have always been shown in dealing with my previous customers and colleagues. I am happy to bring these characteristics to your company.

I look forward to a personal interview with you.

With best regards,
Akram Belajouza

// Experience

2008-2009 **Posar Communications Ltd.** — Webdeveloper

I got my first experience in the field of web development at Posar Ltd. collected as a working student. I was able to quickly integrate myself into the development team and I felt really comfortable. With the help of an internal framework, I have developed platforms such as Sxeen.com and Bestprax.de. Technologies such as Smarty, JQuery, PHP, MySQL and SVN have already been used. I developed typical modules there such as user area, comments, ratings or surveys.

2009-2011 **IT Future AG** — Research and Development

In the IT Future AG I was given the opportunity to deepen my knowledge with projects that are technically much more complex. Portals such as CloudID, VR-Networlds Extranet or IR-Gate were developed. More attention was paid to security aspects and data protection. Clean and well-organized coding was a must. I used Agile Scrum for all projects.

2011-2014 **Tunisia One SARL** — CEO

Due to the interest in outsourcing the development, Tunisia One was founded as a partner of IT Future AG in Tunisia. My role as managing director has allowed me to learn other aspects of collaboration and organization.
Due to a lack of project orders, this partnership was terminated in January 2014.

2014-present **Freelancer** — Senior Webdeveloper

Seeing problems as challenges and looking for solutions with enthusiasm, I continued my passion in web development by working as a freelancer on projects for several clients. This is how I deepen my professional knowledge and take on new challenges.

PORTFOLIO

Akram Belajouza

Senior Webdeveloper

1. CloudID

Duration
6 Months

Link
https://www.cloudid.de

Particularities
Security functions such as encryption and signing of XML data were used.

CloudID is an OpenID provider. OpenID is a decentralized authentication system for web-based services. A so-called single sign-on protocol. It allows a user who has logged in to his so-called OpenID provider once with a user name and password, to log in to all relying parties only with the help of the so-called OpenID URL without a user name and password. The page has been expanded to give the user more transparency. With the help of these changes, the user can then select which data can be exchanged about him.

2. VR-Networld

Duration
12 Months

Link
https://www.vr-networld.de

Particularities
Representation of statistics with the help of graphs to examine user relationships.
Development of a Drupal module.

A single sign-on portal was developed for the Volks- und Raiffeisenbank in order to combine the various authentication systems of third-party service providers. The SAML 2.0 protocol was used for your project. The Security Assertion Markup Language (SAML for short) is an XML framework for exchanging authentication and authorization information. Due to the sensitive data, great attention was paid to data protection and security aspects in this project.

3. Bildungsspender

Duration
8 Months

Link
https://www.bildungsspender.de

Particularities
Search the web using the Yahoo API. Parsing of CSV files the partner.
Generation of DTAUS files for transfers. Postcard generator.

Bildungsspender (Education Donor) is a portal that allows users to donate money to the chosen institution with the help of their purchases and at no additional cost. This can be a daycare center, school, university, association or church. The user simply selects a facility and a shop and buys online. Part of the purchase price is allocated to this facility. This amount can vary depending on the shop and product. Since its inception, Bildungsspender has raised over 2 million euros.

Akram Belajouza

Senior Webdeveloper

4. IR-Gate

Duration
4 Months

Link
https://www.irgate.de

Particularities
Aktienserveranfragen und Bearbeitung der Ergebnisse. JQuery Charts Module.

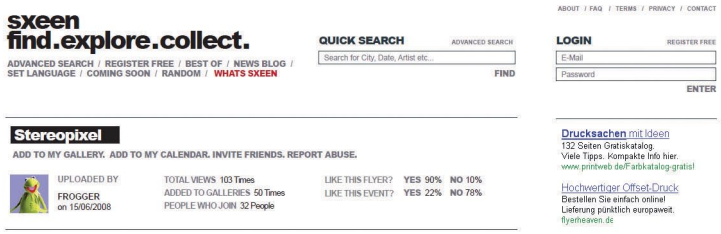

Investor-Relation Gate (IR-Gate for short) is a tool that displays various charts and information using share data. Registered companies can develop pages and then embed them on their websites to share information with their investors. You can see an example of such a page under http://www.deutsche-euroshop.de -> Inverstor Relations.

5. SXEEN

Duration
6 Months

Link
offline seit Ende 2011
(früher sxeen.com)

Particularities
Weiterentwicklung einer internen Framework.

Sxeen is a flyer and event portal. Users can upload flyers to report specific events. Other users can then notify, as on a social platform, whether they are going. Some of the many different functions of the portal are user registration, flyer upload, picture galleries of the events, related events, notification, rating, comments and an advanced search function.

6. Bestprax

Duration
4 Months

Link
https://www.bestprax.de

Particularities
Umfragemodul mit zwischen speichern und weitermachen.

BestPrax is an online platform for benchmarking dental practices. The participants answer a survey that asks for their practice data. These are analyzed and the users get a comparison of the performance parameters with other practices. This enables them to find out the strengths and weaknesses of their practice.

Akram Belajouza

Senior Webdeveloper

7. Golfclub Neuhof

Duration 2 Months
Link http://golfclub-neuhof.de
Particularities Was developed in Typo3

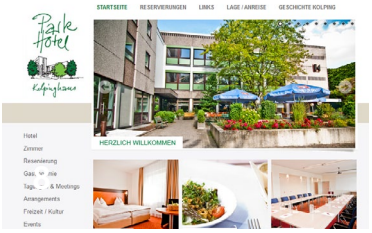

The homepage of the golf club Neuhof is the ideal platform to get information about the club. Places, cutting heights, speed, weather and other important information can be found on the daily news page.

8. Parkhotel Fulda

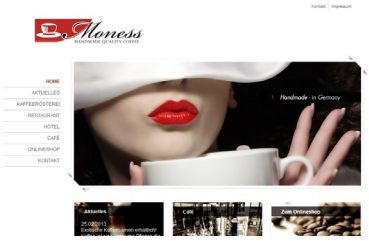

Duration 1 Monat
Link http://parkhotel-fulda.de
Particularities
Was developed in Joomla

The website of the Parkhotel in Fulda introduces the hotel. It describes the types of rooms, the gastronomy and the various conference and meeting rooms that the hotel offers.

9. Moness

Duration 2 Months
Link http://moness.de
Particularities Ecwid, an Online-Shopping-cart, was used.

Moness, the famous coffe brand has its online presence to present its types of co e. An online shop has also been set up so that users can order their favorite coffee online.

10. SVN Browser

Duration 1 Monat
Link Intern
Particularities Execution of Subversion command in terminal using PHP

A web-based SVN browser to execute various SVN commands via the browser and to display SVN information more clearly was developed for IT Future AG.

11. Börsenspiel

Duration 1 Monat
Link Offline
Particularities
Protection against player fraud

A browser-based online game was developed for the women's soccer world championship. It is an exchange in which the price of the shares can rise and fall depending on the results of the game. The three best participants have won prizes.
